 2hrs  13hrs 44mins

**TOTAL**  14hrs  81hrs 54mins

During this 6 Day deployment on an oil site in Canada, the Mobilight Hybrid provided nearly 82 hours of light for the site and yet the diesel generator only ran for a mere 14 hours for the entire week...a typical diesel would have run for 82 hours. Additionally, services for a diesel tower utilizes extra man hours to drive to and from each diesel tower at least twice per day.

### OTHER KEY FEATURES

- Automated Lights
- Remote Monitoring
- 44 days between refueling
- Notification for critical failures
- Drastically reduce emissions, maintenance costs, and fuel costs.
